@PIO pin configuration definitions
   Bit use for defining configurations:
   Bit [1:0] - PIO type (PIO NORM, PIO PerA, PIO PerB)
   Bit [2] - PIO input or output (PIO_OUTPUT)
            - PIO interrupt enable (PIO INT EN)
   Bit [3]
   @ Bit [1:0]
         PIO TYPE_MASK, 0x3
                              @Used to mask out PIO type config bits
   .equ
         PIO NORM,
                   0x0
   .equ
         PIO_PERA,
                    0x1
   .equ
         PIO PERB,
                   0x2
   .equ
   @ Bit [2]
       PIO OUTPUT MASK,
                         0x4 @Used to mask out PIO output config bits
   .equ
         PIO OUTPUT, 0x4
   .equ
   @ Bit [3]
       PIO INT MASK,
                          0x8 @Used to mask out PIO interrupt config bits
